

Reimagine your applications with the most secure, performant, and innovative cloud					
Tracks & Breakout Sessions					
Track 1 Optimize for performance and cost	Track 2 Maximize security and reliability	Track 3 Accelerate application development	Track 4 Reimagine your applications with the most capabilities	Track 5 Migrate and modernize Enterprise Applications	Track 6 Generative Al
Leveraging AWS next- generation infrastructure to build world-class workflows	Top 10 cybersecurity tips for 2023	Build feature-rich applications with AWS Amplify and AWS AppSync	Accelerating application modernization on AWS: A success story	Building the business case for cloud migration	A leader's guide to generative Al: Using history to shape the future
LEVEL 200	LEVEL 100	LEVEL 200	LEVEL 300	LEVEL 200	LEVEL 200
Balancing hypergrowth and optimization	Maximize the security and reliability of your online application with AWS global infrastructure	How thinking asynchronously can lead to speedier apps	How Quora used Amazon EKS to improve user experience and time to market	Accelerate your cloud migration journey with an outcome-driven methodology	Accelerate software development with Amazon CodeWhisperer, an Al coding assistant
LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 300	LEVEL 200	LEVEL 200
Serverless applications costs and performance optimization	Flexible use of encryption to secure data access	From press release to production	Designing next-generation connected vehicle platforms with AWS IoT	Dragonfly: Migrating to a cloud-native architecture while innovating with AWS	Building generative Al applications with Amazon Bedrock
LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 300
How to cost-effectively train and deploy generative Al models with AWS Trainium and AWS Inferentia	Container threat detection and vulnerability management	Using AWS Step Functions and Amazon SageMaker to reduce ML model development time	Lift and shift to a web application to serverless services	Application modernization: An enterprise guide to modernization	Leveraging Bedrock to build Al- based multitenant applications
LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 200	LEVEL 300
Deploying a high performance ML storage infrastructure		Kubernetes deployment and management: From platform to API	Accelerate building, deploying, and scaling data workloads with Amazon EKS	Incremental transformation: From monolith to modern application platform	Accelerate Java development with Amazon CodeWhisperer, your generative Al coding companion
LEVEL 300		LEVEL 300	LEVEL 200	LEVEL 200	LEVEL 200
Redefining supercomputing on AWS	Protect sensitive data in use with AWS confidential computing	AWS storage for Kubernetes and serverless containers	What's new in Amazon EC2	Migrate to modernize: Post-migration workload optimization	Train and deploy Stable Diffusion using AWS Trainium and Inferentia
LEVEL 200	LEVEL 300	LEVEL 300	LEVEL 200	LEVEL 200	LEVEL 200
Takeaways from developers who adopted AWS Graviton	Achieving Zero Trust with AWS application networking	Build your application easily and efficiently with serverless containers	AI/ML at the edge with real world customer deployments	Domain-driven cloud native design	Building Amazon S3 data lakes for generative AI and ML workloads
LEVEL 400	LEVEL 300	LEVEL 300	LEVEL 200	LEVEL 300	LEVEL 200

SESSION LEVELS DESIGNED FOR YOU

INTRODUCTORY

Level 100

Sessions are focused on providing an overview of AWS services and features, with the assumption that attendees are new to the topic.

INTERMEDIATE

Level 200

Sessions are focused on providing best practices, details of service features and demos with the assumption that attendees have introductory knowledge of the topics.

ADVANCED

Level 300

Sessions dive deeper into the selected topic. Presenters assume that the audience has some familiarity with the topic, but may or may not have direct experience implementing a similar solution.

EXPERT

Level 400

Sessions are for attendees who are deeply familiar with the topic, have implemented a solution on their own already, and are comfortable with how the technology works across multiple services, architecture, and implementations.
